REVISED MAP
OF THE
SOUTHEASTERN PART
OF THE
CAHABA COAL FIELD
WITH
COLUMNAR SECTION

A. HOEN & CO.
Engravers and Printers
1905
EXPLANATORY NOTE.

Since the publication, in 1883, of the Map of the Chisholm Field, by Joseph Inquirer, showing contours and the extent of the coal in that area, we have been in receipt of information concerning many parts of the Field and have made necessary a revision of the original map, now out of print. A number of the stations or points of observation have been re-examined, and the map of the Chisholm Field has been revised to correspond with the new information.

The Chisholm Field is of great extent and has by far the best coal in the district. The field is divided into various sections, each of which is distinguished by its own peculiarities and characteristics. The map shows the extent and location of these various sections, together with their relative positions and relationships to each other.

The map is compiled from the best available information and is intended to give a correct and accurate representation of the coal fields as they exist today. It will be found useful for the guidance of all who are interested in the coal industry, as well as for the benefit of the public generally.

J. E. Inquirer

REVISED MAP OF PART OF THE CAHABA COALFIELDS
COMPILED MAINLY FROM THE MAP OF JOSEPH INQUIRER
AND FIELD NOTES OF GEORGE H. BERNIER
1920

SCALE: 1 inch = 1 mile

NOTES:
1. The coal fields are indicated by the shaded areas on the map.
2. The boundaries of the fields are shown by the solid lines.
3. The various sections of the fields are distinguished by different colors.
4. The map shows the location of the major towns and cities in the area.
5. The map provides a detailed view of the topography of the area.
